JFKN.COM

From the Fox News Deck, I am Sheppard Smith. Today at a photo op for world leaders, President Trump **upended** world order in a way no American president has in modern history. He attacked our closest allies, he **berated** them and **insulted** them. He labeled Germany “**Captive** to Russia!” And he blasted NATO agreements that date to post World War Two. President Trump’s **utterance** is not only open the door for a new system overseas. They could also turn back the global clock centuries. In the wake of today’s developments, a reminder now of what NATO is and what means to the world and to America?

NATO is the North Atlantic Treaty Organization, a political and military alliance between North America and Europe. One that rose from the ruins of World War Two, in part, a response to potential Soviet aggression in western Europe. “The Atlantic Pact, 8 nations agree, The United States, Canada, Great Britain, France, Belgium, Holland, Luxemburg and Norway with Italy invited. If one is attacked, the others will consider themselves attacked” In other words, I got your back, you got mine.

A **complete 180** at that time from the **hyper nationalism** that hit for centuries guided Europe. The idea behind that, look out for yourself. In 1949 during the signing, President Harry Truman called NATO, a positive, not a negative influence for peace and added its influence will be felt not only in the area it specifically covers but through the world. And no doubt, its influence has grown. NATO officially started with 12 founding members. It **outlasted** the cold war and now includes 29 nations. Among them, former members of the Soviet Union.

Even after the Berlin Wall fell, NATO continued to play a **pivotal role** in global peace. 1995, NATO faced its first major crisis in a post-cold Europe. It helped **implement** the military end to the war in Bosnia. Then after the attacks of 911, for the first and only time in its history, NATO members **invoked** the all important **Article 5**. **In essence**, it states that one attack, an attack on one country is an attack on all members.

Many NATO members took part in operation “Enduring Freedom” in Afghanistan. In 2003, NATO took over command in coordination of the international security assistance force to try to help create peace in that nation. And in the last decade, the world has witnessed a new threat from **embolden** Russia under Vladimir Putin, including the invasion of Ukraine, the takeover over the Crimean Peninsula. But beyond Russia, a reminder of what NATO exists at all. On one hand, it’s certainly about defense, but it’s also a recognition that in order to thrive, there must be a **collective effort**. All of US in the NATO alliance together.

So here we are today with President Trump slamming our NATO allies to their face on international television at a summit in Brussels. He claims the US spends too much money protecting our European friends from Russia and accuses NATO countries of not spending enough to defend themselves. The truth is every NATO country has paid its bills for NATO shared budget. No country, not one is **delinquent**. About 4 years ago, NATO members agreed to **beef up** their militaries to spend 2% of their countries’ Gross Domestic Product for defense by the year 2024. Obviously that deadline still 6 years away. And only a handful of those countries have reached that goal thus far.

But in each of the last 4 years, vast majority of European nations in the alliance, have increased their defense spending as a percentage of GDP. The combined increase is more than 87 billion dollars in defense spending. The trend is positive, just as President Trump has been demanding. They spend more than Russia, they spend more than China. They’d pledged to spend more. But just today, President Trump asked for more. He said he wants not the 2%, but to double that to 4% of GDP for every single nation. Even America doesn’t spend that much now. And we already have the world’s largest and most powerful military anywhere on the planet ever.

Today, President Trump lashed out at NATO nations that are buying oil and gas from Russia, in particular Germany. “But they are paying billions of dollars to Russia. Germany is totally controlled by Russia. Now if you look at it, Germany is a captive of Russia, because they split, they get rid of their coal plants, they get rid of their nuclear, they are getting so much of the oil and gas from Russia.” Germany is a captive of Russia. Germany is one of our closest allies.

After the attacks of 911, we called on Germany’s leadership to send troops to fight with us in Afghanistan. They answered. They have fought alongside American troops, there, for 17 years. When our soldiers and airmen are **maimed and mauled** in combat, they are regularly flown to Landstuhl Medical Center. In Germany, they get critical care there, have **limps amputated** there. The Headquarters of the United States Air Force in Europe is at Ramstein Air Base in Germany, our 86th air lift wing is there. Our 435th Air Ground Operation’s Wing is there. Our new 515th Air Mobility Operation’s Wing is there. In 2015, for our drone war in Pakistan, Yemen, Afghanistan and Somalia, an important control center is reported to have been housed there.

The Germans provide space and money for our operations in Europe, the Middle East and beyond. Not solely for the protection of Germany, but also so that we can further our objectives and protect our people all around the world. The Germans are close friends and **treasured** allies. The President’s attack on our NATO friends is drawing concerns from quarters around this globe including from both sides of the political aisle here at home. Remember NATO nations replaced US troops as leaders of

operations in Kosovo and Bosnia. They are partners in our engagements with the Islamic State and terrorists in West Africa.

President Putin is meeting with President Trump just days from now in Helsinki. President Trump's aids tell us they will have a one on one sit down which means no advisers, no **transcribers**, no reporters, only translators. Will President Trump tell Putin that sanctions will not go away until he withdraws from Crimea? Will president Trump stand up to Russian **meddling**, will Trump stand with Britain in phase of murders in their countries by Russian nerve agents. We the public may never know exactly what is said. The NATO we created largely in our self interest, so that the United States could trade our goods and spread our values around the world while keeping murderous rulers like Vladimir Putin in check. The same Vladimir Putin, who president Trump says, is fine as he publicly attacks our friends, never before in history.
